

Senior UI/UX Designer

Scholly is looking for a Senior UI/UX Designer to join our team!

As a Senior UI/UX Designer at Scholly, you'll work closely with customers, product managers, and software engineers to define, design, prototype, update and create new mobile and web products for the company.

You should be an optimistic problem solver, and product designer who knows your industry like the back of your hand, and be skilled with the tools you'll need to do your job.

Please only apply if you have worked for a tech company similar to Scholly (mobile applications).

Responsibilities:

- Produce deliverables on programs of all sizes with little oversight
- Translate concepts into user flows, wireframes, mockups and prototypes that lead to intuitive user experiences.
- Facilitate the client's product vision by researching, conceiving, sketching, prototyping and user-testing experiences for digital products
- Design and deliver wireframes, user stories, user journeys, and mockups optimized for a wide range of devices and interfaces
- Take a user-centered design approach and iterate designs
- Use UX design best practices to design solutions
- Collaborate with other team members and stakeholders
- Mentor junior team members

Requirements:

- 6+ years experience designing UI & UX for small and large scale web sites, mobile applications, desktop applications
- Proven experience leading the UX practice on projects
- Well-versed in Squarespace and WordPress
- Track record as a creative problem solver with a knack for fresh ideas and a new perspective
- Solid grasp of user-centered design, rapid prototyping, heuristic analysis, usability, accessibility concerns and functional specifications
- Expertise in human interface guidelines, standards, and best practices as they apply to platforms
- Fluency in appropriate software (e.g., Adobe InDesign and Adobe Illustrator, Sketch etc..) to create professional-quality, well-designed deliverables

- Ability to clearly and effectively communicate design processes, ideas, and solutions to teams and clients
- Deep understanding of mobile-first and responsive design
- Deep understanding of modular systems and design patterns
- Open to receiving feedback and constructive criticism
- Passionate about all things UX and other areas of design and innovation
